

SAP Business One for project industries

The advantages at a glance:

Complete project industries solution

Graphical project, resource & material planning

Project based material management

Easy to use (web) time entry

Direct insight into margin pre- and post-calculation

Over 150,000 users work daily with SAP Business One

Full integration with SAP Business One

SAP Certified Solution

Target group:

SAP Business One for Project industries is well matched for a wide range of industries and companies who manage some or all of their business as projects. It is also highly suitable for companies with a combination of trade, service and projects.

Runs with:

SAP Business One.

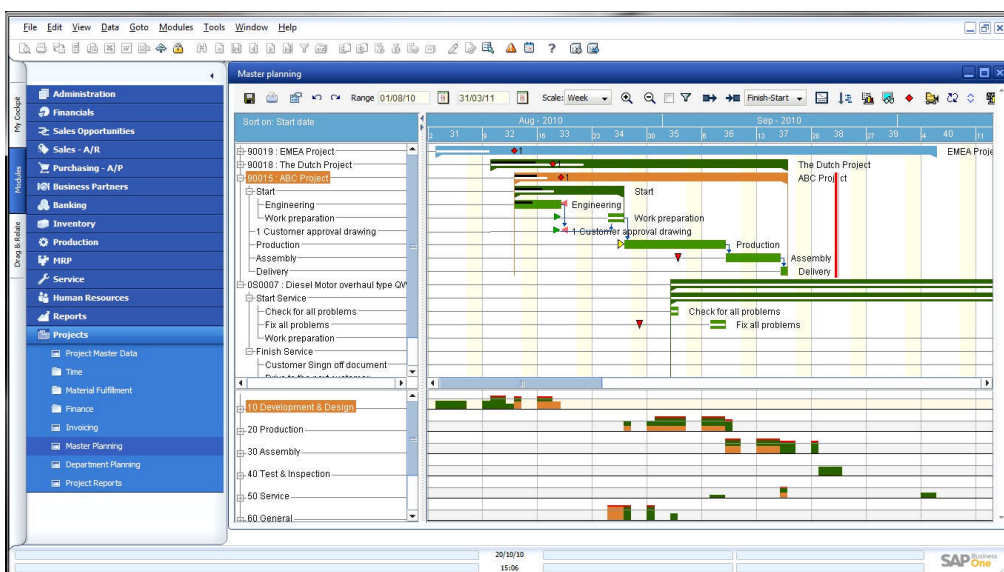

The solution:

variatic BX PROJECT transforms SAP Business One into the ideal choice for project driven companies. It is a completely integrated solution with a consistent user interface and one database. It provides a fully functional solution: project, material & capacity planning, logistics, pre-calculation and job order costing, accounting, CRM, time registration and invoice schedules. Worldwide SAP Business One for project industries is being used by over 400 companies in the "make project" business, e.g. in the area of machine and equipment building, energy, maritime and recycling.

Your benefits:

A project industry solution seamlessly integrated with SAP Business One. Easy to learn and use, yet very powerful for your company. The modern structure ensures flexibility during the complete product life-cycle.

For many companies variatic BX Project is the foundation of a well-managed, flexible and profitable business. The results are: on time delivering, higher project margin, better resource utilization and less stress.
