

Quality Control for SAP Business One

Quality Control is an Add-on for SAP Business One that helps a company maintain quality information for Raw Materials, WIP and Finished Goods. The solution has been designed for process manufacturing companies e.g. Pharmaceuticals, Food and Chemicals.

Overview of Features

1. Define quality standards for:
 - Raw Materials
 - Production Process of Finished Goods
 - Finished Goods
2. Maintain multiple versions of quality standards
3. Maintain quality standards of customers for finished products
4. Create test requisition for raw materials from the GRPO screen
5. Lock batches upon receipt from supplier to ensure it cannot be issued for production
6. Unlock batch upon successful quality check
7. Attach quality certificate with batch of raw material
8. Create WIP test requisition from Inecom Routing & WIP Add-on WIP Tracking screen
9. Create Finished Goods test requisition from Sales Delivery screen
10. Generate customer specific Inspection Certificate from Sales Invoice screen
